- x MATH 109 (Q) Pre-Calculus Mathematics
- x PSYC 225 (S) Abnormal Psychology
- x PSYC 226 (S) Lifespan Development: Cognitive and Biological
- x PSYC 227 (S) Lifespan Development: Social and Emotional
- x PSYC 230 Sensation and Perception
- x PSYC 232 Psychology of Language

Free Electives (12 credits)

Total 120/120.5 credits

Course Descriptions

EN 100

3 cr.

This seminar will introduce the basic concepts of communication science and disorders of speech, language, and hearing. Emphasis is placed on the analysis of speech production, comprehension, auditory perception, and the cognitive and social dimensions of language. The role of professionals in diagnosing and treating communication disorders is introduced.

EN 103

3 cr.

This course explores the sounds of American English and provides students with the basis for representing speech sound production using the International Phonetic Alphabet (IPA). The course also covers aspects of articulatory and linguistic phonetics and

introduces dialect variation and clinical phonetics with an emphasis on transcriptional phonetics.
